

BBQ CLEANER

FOUROX-S

PROFESSIONAL BBQ CLEANER

- * Strongly alkaline product.
- * Easily removes heavily charred and caked-on contaminants from vegetable and animal fats, proteins, smoke deposits.
- * Ideal for BBQ grills, but also ovens, grills, pots and pans, deep fryers, smokers, etc.
- * Can also be used with dipping method.

How do I use Elja BBQ Cleaner?

Apply the undiluted product with a brush or spray bottle. About 1 to 3 hours. Allow to act and then rinse well with clean water. Wipe dry to prevent rusting. The nature and degree of contamination determine the duration of the exposure time. If the object can be heated, this can speed up the operation.

DIP METHOD : dilute with water to max. 1 in 4. Allow the object to be treated to rest in the immersion bath for 2 to 18 hours. Then rinse well with water and rub dry. The solution in the immersion bath can be further used for the next treatment.

ATTENTION ! Do not use on aluminum, copper, brass, galvanized or painted surfaces (test in an inconspicuous area first). Paints, varnishes and coatings are affected when Elja BBQ Cleaner is used.

Technical data

Look	Transparent fluid
Color	Red
Conservation	Unlimited at room temperature in closed packaging
	Bewaar het product in originele gesloten verpakking en bescherm het tegen zonlicht en extreme temperaturen.
Stability	Store away from frost
Packaging	500ml spray, 1L spray, 1L , 5L
