- * Suitable for use in the food sector for the disinfection of work surfaces, kitchen appliances,....

Where can I use Elja Disinfectant?

This antibacterial disinfectant is ideal for cleaning all your surfaces. Whether it concerns tiles in the kitchen, sanitary facilities, stainless steel or the floor, with this disinfectant you have it all hygienically clean in no time.

How do I use Elja Disinfectant?

First clean the surface or object thoroughly, this can be done with Elja Bio-Cleaner. The disinfectant must be able to reach the surface in order to actually disinfect. If the surface is full of dirt, this is less possible.

Before applying the product, thoroughly clean the surfaces to be disinfected with Elja Biocleaner and rinse with clean water. Remove the excess water. Dilute the product in a ratio of 1:10 to 1:5. If the surface comes into contact with food, rinse thoroughly with clean water. Then dry with a clean cloth. Repeat the application if necessary.
